

ELEVATE Headworn Microphone Setup Guide

The headworn microphone is lightweight and stays in place when moving around. It is ideal for noisy environments, and also provides an alternative to the lanyard. The belt clip and mic will work with both the Action! and Bravo! mics.

Step 1

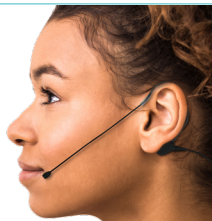

Remove the existing battery door. Remove the lanyard clips if you do not intend to alternate between lanyard and belt. Attach the belt clip battery door.

Screwdriver included in mic original box.

Step 2

Hook the end over the top of one ear. Adjust the mic to 1 - 1.5 inches (2.5 - 4cm) from mouth.

Step 3

Insert plug into microphone jack.
