FlashForge Finder	MakerBot 5th Replicator	Ultimaker 2 Extended(+)	
	MakerBot 5th Replicator Z18		

\*These printers have customized instructions for connecting them to our website. Look for their specific How-to Videos.

## Experimental Printers:

Experimental printers will most likely work in our website. However, we have not yet verified a user with that specific model, so some of our pre-set print settings may need adjusting for the below printers or the connectivity may not work as we envision. Please verify that your printer works prior to purchasing a subscription. You can sign up for a free trial to verify connectivity of your particular printer.

If you are experiencing connectivity or print issues with your non-Robo printers, please coordinate both with our customer support at [customercare@boxlight.com](mailto:customercare@boxlight.com) and the support personnel at 3DPrinterOS at [help@3dprinter.com](mailto:help@3dprinter.com) as we are partnered together to enable your printer to utilize MyStemKits!
